SRI Identity™ and Galaxy Control Systems Announce Integration and Reseller Agreement

Multipurpose, Cost-Effective Biometric Reader Compatible with Access Control Leader

Las Vegas— April 6, 2016—SRI Identity™, an SRI International line of business, and Galaxy Control Systems today announce that the SRI IOM Access Control Tablet now supports integration with System Galaxy Access Control software. The SRI IOM Access Control Tablet will also now be available through the System Galaxy network of dealers. The integrated capabilities of the IOM Access Control Tablet with System Galaxy Access Control software will be demonstrated at the booths of SRI Identity (# 25014) and Galaxy Control System (# 5089) at ISC West 2016, the largest security industry tradeshow in the U.S.

SRI Identity™

[SRI's IOM Access Control Tablet](#) fuses access control readers, biometrics, keypads, intercoms, cameras and more to establish a new benchmark for cost-effective value and functionality for the security marketplace. This user-friendly product delivers iris recognition, the gold standard of biometric identification, on a flexible Android® tablet. By integrating with System Galaxy's security and building management functions, customers can experience broader IOM Tablet capabilities that can improve access control security and provide greater operational efficiencies.

“The ability to integrate the IOM Access Control Tablet with System Galaxy Access Control systems unlocks new opportunities for customers looking beyond today's access control functionality to new security and operational capabilities,” said Mark Clifton, President, Products and Solutions Division, and Vice President, SRI International. “Together with Galaxy, we are delivering new, cost-effective functionality to the security industry.”

“We are excited to expand our extensive list of integrated readers and offer our customers the best possible choices to meet their installation needs,” said Robert Laughlin, President, Galaxy Control Systems. “This integration with SRI Identity gives System Galaxy users the opportunity to implement innovative iris recognition technology for enhanced security in a very cost-effective way when implementing new or expanded access control infrastructure.”

About SRI Identity

[SRI Identity](#) develops solutions to verify and manage identity information. With many proven installations in place around the world, we address a diverse range of applications including critical infrastructure, public arenas and border control. Using our unique technical expertise developed through our long history of research and

invention, we create and integrate the world's fastest, most accurate, and most versatile non-intrusive identity solutions.

About SRI International

[SRI International](#) creates world-changing solutions to make people safer, healthier, and more productive. SRI, a research center headquartered in Menlo Park, California, works primarily in advanced technology and systems, biosciences, computing, and education. SRI brings its innovations to the marketplace through technology licensing, spin-off ventures and new product solutions.

About Galaxy Control Systems

Galaxy Control Systems, a privately held company headquartered in Walkersville, MD, is a leader in the integrated access control industry. The company's hardware and software solutions, all manufactured in the USA, provide access control, video surveillance, alarms, photo-imaging, badging, elevator control, building management and time and attendance for small applications, fully integrated security management systems and enterprise-class control systems. All Galaxy Control Systems products are scalable and backwards compatible, designed and engineered to deliver lower Total Cost of Ownership and a higher Return on Investment than competitive products. With unsurpassed technical support, Galaxy supports its reseller partners with free on-going training while providing the highest levels of system implementation and maintenance. For more information on Galaxy Control Systems' extensive line of products, visit www.galaxysys.com.
